

Broadcasting TV and Radio programs via satellite, coding and multiplexing it into MPEG2 ? You need added high value communication services as data transmission or duplex communication between many sites ?

❖ SOLUTION

Metracom, well known integrator in the Satellite communications is able to develop its expertise in engineering, production, installation and services to satisfy the needs of DVB platform either in France or on the international market.

DVB platforms can be more or less complex and allow mainly distribution and broadcasting of media contents (TV, Radio, Internet...).

The platforms allow to develop numerous possibilities :

- statistical multiplexing in order to optimize the contents and control debits;
- access control according to the number of reception points and the parameters required in term of subscribers management;
- control of the broadcast network by addition of commands allowing local unhooking, downloading of contents, services affectation.

In these digital platforms, Metracom associates tools of control & management. The routing & monitoring solution is defined with the respect of the operational constraints.

METRACOM focuses its engineering knowledge's in system design, integration, delivery, installation, and acceptance. A project manager is appointed from the early quote stage of the project until the final delivery of the platform. METRACOM also offers a range of tailored services and adapted trainings.
