

Covering the news as fast as possible and at the lowest cost while keeping a broadcast quality transmission is the constant goal of all editorial staffs. Being able to get back real-time data on a distant site, to operate audio & video streaming, to establish emergency phone connections, to be linked with internet from a desert area... These examples show that, today, whatever the distance and climatic conditions, the operator should be able to send audio-video-data signals from everywhere in the world.

❖ SOLUTION

Live Event !

By developing partnerships with reliable manufacturers, Metracom is able to study, to size, to propose and to integrate fly stations and also to give adapted trainings session to your teams.

The Fly stations solutions are suitable for a large variety of applications and are developed to work under hostile climatic conditions. Easily deployable, they are available from 0,90m to 3,70m !

These stations benefit from an optimal ergonomic design / weight. This facilitates the transportation in any type of vehicles : plane, helicopter, car...

Approved by Eutelsat, Intelsat and FCC compatible, the fly stations are available in C, X, and Ku band, and allow broadband transmission up to 10Mb/s and more!

Since 2002, Metracom develop and manufacture TIPIC'S, its own ultra mobile satellite communication terminal. Less than 50Kg, 90 cm in X, Ku or Ka band. Operational within 15 minutes and even less in X band, this terminal can be declined for several applications like :

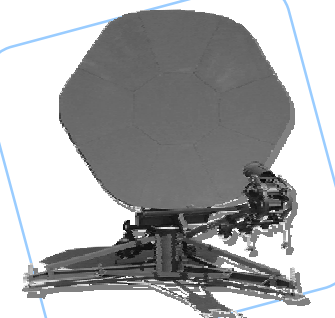

- live broadcast, audio & video transmissions,
- audio & video streaming from hostile locations,
- re-establishment of emergency connections in case of disasters,
- occasional transmissions (video conferences, debates, training),
- provision for Internet or phone connections from the ground.

❖ METRACOM, Satellite communications integrator

Competitiveness, Reliability, Neutrality, Quality are our commitments!

Because you and your projects are unique, we have to be a reliable partner for you. We want to be available and in touch with you in order to offer you suitable solutions as well as services and a real support.

So, we anticipate the technological developments, and we invest in those. We also make use of very strong partnerships contracted with the suppliers of technologies. For each project, we call on a specialist team services endowed with a great expertise acquired near operators, integrators, famous manufacturers belonging to the Satellite world. We are always at your sides here, over there, everywhere else.
